

Aryan Bhardwaj

Portland, OR (open to relocation & remote) | 971-218-3141 | ab@rearyan.com | rearyan.com | GitHub | LinkedIn

Operator who builds. MBA + MS Data Science. Run revenue channels (Faire, Amazon, iHerb, TJ Maxx) and shipped 5 production applications automating order-to-ship operations at a specialty manufacturer.

EXPERIENCE

Data & Growth Consultant Mar. 2025 – Present

The Tao of Tea — specialty tea manufacturer & wholesaler *Portland, OR*

- **Launched and scaled the Faire wholesale channel from zero** to 33 retail accounts across 11+ states in 9 months, 4×-ing monthly run rate in the second half; earned and held Top Shop status 9 consecutive months with zero late shipments.
- Built the supporting analytics in Python — basket/co-occurrence analysis, RFM segmentation, and cohort retention — and acted on the insights (a product trio in 43% of orders became a bundle strategy).
- **Secured price increases across Amazon Vendor Central and iHerb**, managing both retailer relationships; onboarded TJ Maxx as new accounts; own key-account promotion forecasting.
- **Designed and deployed 5 production applications** using AI-assisted development (Claude Code, Cursor) with Rust, TypeScript, React, Tauri, and Python automating order-to-ship: PO parsing, demand planning, constrained carton-packing optimization, case labeling, packing slips. Cut processing from 40 minutes to less than 2 minutes. Self-initiated, now in daily use by non technical staff, replaced the manual process entirely.
- **Completed a QuickBooks migration stalled for 11 years in two weeks**, with zero disruption to operations.
- Drafted FDA FSMA/FSVP compliance documentation and SOPs; lead concurrent special projects with the founder — facility expansion, warehouse liquidation and equipment auctioning, website migration.

Chief of Staff (Contract) Jan. 2025 – May 2025

Stealth Startup *Remote*

- Built an internal SaaS hiring tool with no-code platforms and GenAI, cutting time-to-hire 40%; launched the company website in 2 weeks. (*pre-seed, 5-person team.*)

Data Science Intern (Internship) Dec. 2024 – Mar. 2025

TruTrip *Remote*

- Built data pipelines and governance frameworks for U.S. market expansion; presented market trend analysis to leadership, informing retention strategy.

Search Quality Evaluator (Contract) 2017 – 2022

Appen *Remote*

- Evaluated search results for relevance and quality against rigorous rater guidelines for a major technology client (under NDA) across web, image, and local verticals; maintained quality thresholds through 5 years of continuous renewals — early human-in-the-loop evaluation for large-scale ML systems.

SELECTED PROJECTS

The Tao of Tea Operations Suite | Rust, TypeScript, React, Tauri, Python | github.com/aaryanbh96

- End-to-end warehouse automation: PO Aggregator, PO Processing & Carton Optimization (weight-ceiling bin packing), Case Label Printer, Incoming Shipment Label Generator (deployed to thermal printers), Packing Slip Generator.

Faire Wholesale Channel Analytics | Python, Pandas, Plotly, Seaborn | rearyan.com/faire-analysis.html

- Full analysis of wholesale channel — basket/co-occurrence analysis, RFM retailer segmentation, cohort retention, and Pareto concentration — surfacing a product trio in 43% of orders that drove a bundle strategy.

EDUCATION

Willamette University, Master of Science in Data Science *Salem, OR, Aug. 2023 – Aug. 2024*

Willamette University, Master of Business Administration *Salem, OR, Aug. 2022 – May 2024*

Doon University, Bachelor of Arts (Honors) in German *Dehradun, UKD, Jul. 2014 – Jul. 2017*

SKILLS

Build stack: Rust, TypeScript, React, Tauri, Python, SQL (Postgres) — AI-assisted development (Claude, Cursor)
Data: Pandas, Polars, NumPy, Scikit-learn, statistical analysis, RFM/cohort segmentation, demand forecasting, Plotly, Seaborn, Matplotlib, Tableau
Operations: Amazon Vendor Central, Faire, iHerb, QuickBooks, FDA FSMA/FSVP, channel P&L, vendor negotiation
Tools: Git, Docker, GCP, Excel (advanced), Claude Code, Cursor, AI-assisted development workflows
